Education

Bachelor of Science: Cybersecurity

Expected in 05/2028

University At Albany, SUNY - Albany, NY

- Cyber Defense Concentration

Associate of Applied Science: Cybersecurity

05/2026

Suffolk County Community College - Selden, NY

- 3.6 GPA
- Phi Theta Kappa Member

Certifications

[CompTIA Security+ \(SY0-701\) Certification](#)

Technical Portfolio

- flamj95.github.io

Professional Experience

IT Office Assistant

06/2026 to Current

Suffolk County Department of Social Services – Ronkonkoma, NY

- Develop and maintain technical documentation for IT project management, system development lifecycle, disaster recovery, and operational processes to support standardized technology practices.
- Research and document Active Directory administration and security best practices, including group management, object attributes, access controls, stale-device auditing, and least-privilege principles.
- Evaluate SQL Server privilege-management strategies and develop approaches for separating developer responsibilities using Active Directory and database-level access controls.
- Conduct technical research and analysis of enterprise technologies, including Microsoft Intune and Windows Autopilot, to support potential implementation and modernization initiatives.
- Collaborate with IT Applications staff to evaluate existing processes and develop recommendations related to security, infrastructure, access management, and IT governance.

McDonald's Restaurant – Rocky Point, NY

- Supervised daily operations, ensuring adherence to company policies and procedures.
- Trained new team members on customer service standards and operational workflows.

Technical Skills

- **Networking:** TCP/IP, VLANs, Routing, DHCP, DNS, Cisco IOS, Fortinet/FortiGate
- **Systems:** Windows Server, Active Directory, Group Policy, NPS/RADIUS, Linux, VMware ESXi
- **Security:** Vulnerability Assessment, Incident Response, Access Control, Security Operations
- **Tools:** Nessus, OpenVAS, Nmap, Wireshark, Nagios, Autopsy, Volatility
- **Technologies:** SQL Server, Docker, Apache, HTML

Projects

Enterprise Cybersecurity Capstone

- Designed and administered a virtual enterprise environment incorporating Windows Server, Linux, Cisco networking, VLAN segmentation, Active Directory, RADIUS, and security monitoring.
- Conducted vulnerability assessments using Nessus/OpenVAS and documented infrastructure, findings, and remediation recommendations in a comprehensive technical report.

Active Directory & Domain Services Lab

- Built a Windows Server 2022 domain environment with multiple domain controllers, DNS, DHCP, organizational units, users, groups, and permissions.
- Configured NPS/RADIUS to provide centralized Active Directory authentication for network infrastructure.

Digital Forensics Investigation Project

- Conducted forensic analysis of Windows systems using Autopsy and Volatility to identify file system, memory, metadata, and user-activity artifacts.
- Documented all findings in a professional technical report along with screenshots, evidence notes, and a conclusion.
